

INSTALLATION GUIDE

You can get the files from here:

<https://drive.google.com/drive/folders/1ARsiqFlfOnVZN8D4Frv6VrGOHHj5AeS5?usp=sharing>

Module 1: Python installation

(If you have Python 3.7.4 or higher version then skip step 1 & 2)

Step 1:

Download “**python-3.7.4-macosx10.6.pkg**” from the Google Drive Link which is mentioned above, and start installation by double clicking on downloaded file.

Step 2:

As shown in Fig. 1,

1. Check “**Install launcher for all users**” and “**Add Python 3.7 to PATH**”.
2. Click on “**Install Now**” and wait until installation gets complete.

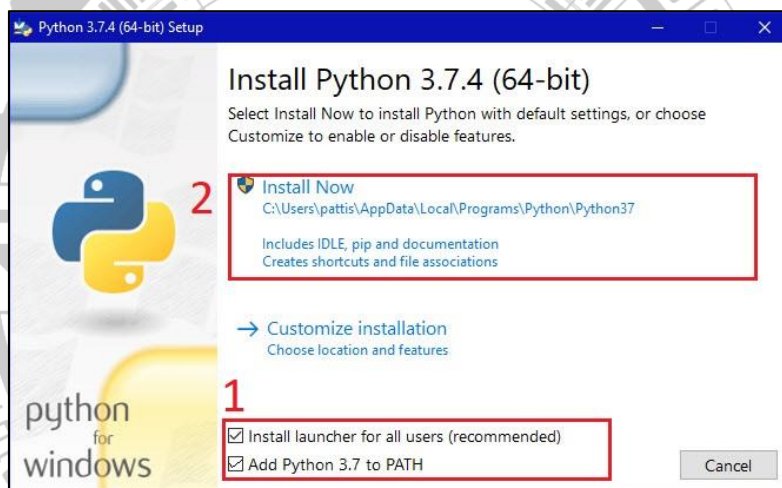

Fig 1. Python Environment Installation

Installing packages:

Step 1: Open Terminal.

Step 2: Install packages by typing commands given below.

1. `pip3 install --upgrade pip`

A terminal window with a dark background. The prompt is 'Shisirs-iMac:~ shisirkumardas\$'. The command 'pip3 install --upgrade pip' is entered and highlighted with a green selection bar.

*Fig 2. Command for upgrading **pip** Installer*

You should get the following **similar**(versions may differ) success message after installation.

A terminal window showing the output 'Successfully installed pip-20.2.3' in a large, bold, white font on a black background.

Fig 3. Message after Successful upgrade

2. `pip install numpy opencv-python jupyter`

A terminal window with a dark background. The prompt is 'Shisirs-iMac:~ shisirkumardas\$'. The command 'pip install numpy opencv-python jupyter' is entered and highlighted with a green selection bar.

Fig 4. Command for Installing Packages

You should get the following **similar**(versions may differ)success message after installation.

A terminal window showing the output 'Successfully installed jupyter-1.0.0 numpy-1.19.2 opencv-python-4.4.0.42' in a large, bold, white font on a black background.

Fig 5. Message after Successful Installation of all the Packages

Now you are all set to write your first code in openCV.

See you in the workshop!!

(If you face any error while installing any of the mentioned package or you have other queries, then kindly ask in the WhatsApp group)
